POOL OF POOLS OPERATION IN LOS ANGELES AND LONG BEACH BEGINS MARCH 1, 2015

Flexi-Van Leasing, Inc. is pleased to confirm that effective March 1, 2015, three major chassis pools serving the Los Angeles and Long Beach Port complex have entered into an agreement allowing their chassis fleets to interchange between pools on a free-flow basis. The three pools involved in this agreement are the Los Angeles Basin Pool (LABP), the Grand Alliance Chassis Pool (GACP) and the Direct Chassis Link Pool (DCLP).

Commonly referred to as the "Pool of Pools", this new agreement encompasses a combined fleet of approximately 80,000 chassis with an expanded set of 12 common start/stop locations covering all major Marine and Rail Facilities in the port complex.

Under the "Pool of Pools" operation, any chassis in the combined fleet can be utilized by any party who is an authorized user in one or more of the aforementioned pools. Further, chassis in the combined fleet can be utilized or dropped at any location named in the expanded set of stop/start locations, regardless of the markings on the individual unit. This "gray fleet" operation should increase overall availability while eliminating chassis splits or swaps previously caused by mismatch of User and Pool at major facilities.

While the essential terms and conditions of current usage agreements with FVLI remain in effect, our LABP customers and Motor Carriers can immediately take advantage of the increased of chassis fleet utility and the expanded set of stop/start locations under these contracts. Please refer to below for a list of these locations.

We will offer further updates in due course. Meantime, please visit our website for more information regarding "Pool of Pools" operation and Flexi-Van usage agreements www.flexi-van.com

With sincere thanks and trusting that all our customers will enjoy benefit from this change,

Flexi-Van Leasing, Inc.
